Office Action Summary	Application No. 10/073,393	Applicant(s) BURNS, JEFFREY R.	
	Examiner Charles Kim	Art Unit 2623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the steps involved in the automatic generation of the printed document must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to claim 1, the phrase “assigns a value indicative of entry clearance” in lines 25-26 and lines 30-31 renders the claim indefinite because it is unclear whether the “value” assigned in line 25 is equivalent to the “value” assigned in line 30. It appears that the applicant intended the second instance of the phrase “assigns a value indicative of entry clearance” to read “assigns another value indicative of entry clearance”. Appropriate correction is required.

Referring to claim 9, the phrase “the photographed image” in line 1 lacks antecedent basis. It appears that the applicant intended the phrase to read “the photographic data of said visitor”. Appropriate correction is required.

Referring to claim 13, the phrase “queries posed by said computer” in lines 2-3 lacks antecedent basis. For example, claim 1, lines 14-15, indicates that the queries are posed by the arrangement, not the computer. Appropriate correction is required.

Referring to claim 14, the phrase “said computer posed queries” in lines 1-2 lacks antecedent basis. For example, claim 1, lines 14-15, indicates that the queries are posed by the arrangement, not the computer. Appropriate correction is required.

Claims not mentioned specifically are dependent from indefinite antecedent claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 16-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Korosec et al., U.S. Patent Application Publication No. 2003/0196097 ("Korosec").

Referring to claim 16, Korosec discloses a controlled entry device (1010, 1050) comprising a PC monitor, keyboard, card swipe data entry means, camera, audio speaker and printer means [page 8, paragraphs 93 and 97], in electric communication with a controlling computer (1030) comprising a controller means, comparator means, computing means, data storage means and means for remote communication [page 8, paragraphs 94-96 and figure 10].

Referring to claim 17, Korosec further discloses that the controlling computer is in enabling communication with a remote data storage means [page 8, paragraph 95 and figure 10].

Referring to claim 18, Korosec further discloses that the controlling computer comprises a remote central computer means [figure 10].

Referring to claim 19, Korosec further discloses that the device comprises a microphone for input of voice data [page 8, paragraph 93].

Allowable Subject Matter

4. Claims 1-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Cadorette, Jr. et al. U.S. Patent No. 6,341,169 discloses a method for validating an identification document by comparing a photographic image of a user and name identification data with stored photographic image data and name identification data.

b. Slocum et al. U.S. Patent Application Publication No. 2001/0026631 discloses a method for automatically generating a printed document containing a photo identification of a user based on a photographed image of the user and name identification data.
